Satellite radio is the greatest. What more can you ask for when you get commercial free music all type of music, you can listen too sports and you can get live local news & weather at all time. What i also love about it is the extended traffic news. I leave upstate NY where the local NYC radio signal doesn't come on as clear as the satellite radio does. There's a lot of interference. Most of the time i'm forced to insert a CD so i don't have to listen to music or AM news with a lot of interference. Keep Satellite Radio going.
